

AquaStart™

Hydration Supplement & Feed Attractant Attractant Feed Topper For All Poultry

Aquastart™ is a ready to use water gel bead and feed attractant product that provides hydration and encourages feed discovery for newly placed poultry. Enriched with electrolytes and nutrients and attractant color, the beads promote early feeding and drinking to support health, growth, and performance.

Facilitates early awareness of feed and water

Prompt access to feed and water after introduction to the brooder is essential for hatchlings, as it accelerates the development of their digestive and immune systems, laying the groundwork for healthy growth.

Critical performance indicators for poultry producers—such as 7-day mortality, body weight, gut health, disease resistance, and overall livability—benefit greatly from early hydration and proper nutrition.

Distinctly better choice

Nutritional Hydration: Water gel beads are enriched with electrolytes and betaine, delivering both hydration and nutritional support.

Highly Attractant: Translucent green color designed to stimulate hatchling interest and encourage quicker feed discovery.

Nutritional Information per 100g (calculated from database figures)			
Calories	18.6 kcal	Cholesterol	0.1 mg
Protein	0.1 g	Water	92-96 %
Carbohydrates	4.5 g	Calcium	190.6 mg
Sugars	1.7 g	Potassium	73.2 mg
Dietary Fiber	1.2 g	Sodium	151.3 mg

Ingredients

Purified Water, Corn Syrup, Hydrocolloids, Food Acids, Modified Food Starch, Electrolyte Blend, Calcium Acetate, Betaine, Food Colors, EDTA.

Instructions

Drain any excess liquid in the bag. Sprinkle AquaStart on any feed starter to attract and hydrate day-old poultry. Can hydrate 100 chicks or 60 poults.

Shelf Life

18 months at room temperature. No refrigeration required if unopened.
